

Physiolab GP8 System – Order check sheet

Additional items required to operate this system – Software to be downloaded from the website physiopilot.com, download file may be moved by flash drive or CD to any number of computers. Newer computers with Windows 7 or XP will provide the best results. The GP8 requires two AAA alkaline battery cells.

COMPLETE SYSTEMS		
GP8-EEG	Physiolab GP8 EEG System with all items listed in EEG kit below.	\$355.00
GP8-ECG	Physiolab GP8 heart rate variability and respiration system all items listed in ECG kit below and GP-5u respiration belt.	\$425.00
GP8-EMG	Physiolab GP8 System with all items listed in EMG kit below.	\$355.00

GP8 :	Physioamp interface only	\$295.00
	Basic instrument with no cables, supplies or software. This unit is common to all systems and kits on this page.	

EEG KIT: All items listed below	\$140.00
Basic EEG software, EEG feedback and Alpha Theta	\$100.00
TP-18 lead set, 18 inch 1.5mm socket and snap	\$20.00
SE-22a ear clips and electrodes, 2 each	\$15.00
SE-20 electrodes and paste cups, 100 each	\$15.00

ECG KIT: All items listed below	\$140.00
ECG software, including optional sensor support	\$100.00
TP-40 lead set, 40 inch, 1.5mm socket and snap	\$25.00
SE-23 electrodes and holders, gel free wrist type	\$25.00
WB-2 elastic wrist bands	\$5.00

EMG KIT: All items listed below	\$150.00
Basic EMG software, with spectral fatigue monitor	\$100.00
TP-40 lead set, 40 inch, 1.5mm socket and snap	\$25.00
SI-55 pre-gelled electrodes, 100 each	\$35.00

OPTIONAL AND REPLACEMENT CABLES FOR PHYSIOLAB GP8	
GP-1u temperature sensor, thermistor bead type	\$40.00
GP-2u dual temperature sensor, thermistor bead type	\$60.00
GP-4u PPG, finger heart rate and blood volume pulse	\$90.00
GP-5u Respiration sensor belt	\$90.00
GP-7u IR temperature sensor (PIR type)	\$145.00
